APELLIDOS

In the Spanish-speaking world people commonly use the last name of both their father and their mother (in that order). Thus, if Pedro García Fernández and María Piñedo Saavedra have a daughter called Eva, she will be known as Eva García Piñedo. This custom is followed in all official documents, though in everyday use many people use only their first surname. When a woman gets married, she usually keeps her full maiden name, rather than adopting her husband's. However, she can choose to adopt her husband's first surname as her second, or she can be known by her husband's name. So, if Eva García Piñedo married Carlos Hernández Río, she could either keep her own name intact, change it to Eva García Hernández or be known as Señora de Hernández Río. In Latin America she might also be known as Eva García Piñedo de Hernández.

ASADO

The **asado** is the pre-eminent culinary/social celebration in Argentina and Uruguay. Any occasion is a good excuse - birthdays, wedding anniversaries, public holidays and even an ordinary Sunday will do. An **asado** is a meal for family and/or friends, at midday or in the evening, where the main dish is beef roasted outdoors on a barbecue. This can be served with potatoes, red peppers, cheese or chicken, and various types of sausages and offal, all cooked on the barbecue. The wood used in the fire gives a unique and unmistakable flavour to the food. It takes some time to get the food ready, so the guests at an **asado** will have plenty of time to chat and socialize over drinks by the fire.

BARAJA ESPAÑOLA

The Spanish deck of playing cards is markedly different from that used in the United States and the rest of Europe (which is known as the "baraja francesa", or "French deck", in Spain). The Spanish deck is made up of four suits: "oros" (gold coins), "copas" (gold cups), "espadas" (swords) and "bastos" (clubs). There are no cards numbered eight or nine. The "sota", or jack, is counted as ten, followed by the "caballo" (a knight on horseback) and the "rey" (king). Among the most common games played with these cards are "la brisca", "el tute" and "el mus", but there are many others.

Bolívar *n pr* **(Simón)** ~ (Simon) Bolivar

BOLÍVAR

The greatest of the leaders of Latin America's struggle for independence from Spain, Simon Bolivar was born in Caracas, Venezuela on 24 July 1783. From an early age he was an advocate of independence from Spain, and he propagandized for it on his travels through Latin America, Europe and the United States. Venezuela declared itself independent in 1811 at his prompting, and in 1813 he led a victorious army into Caracas, gaining for himself the title of "Libertador" ("Liberator").

In 1819 he founded the state of Gran Colombia (including modern-day Venezuela, Colombia, Panama and Ecuador), and became its first president. His only rival of equivalent stature was José de San Martín, who freed his native Argentina and helped in the liberation of Chile and Peru. After Bolivar met San Martin in 1822, the Argentinian resigned his position as protector of Peru and went into exile in France. Bolivar's subsequent victory at the battle of Ayacucho in 1824 finally secured independence for Peru and brought an end to Spanish rule in South America.

In 1826 he opened the Congress of Panama, which sought to give concrete form to his ideal of a united confederation of Latin American states – an ideal which has been cherished by many Latin Americans since his day. Disillusioned by the failure of his pan-American ideal in practice, he retired from public life in 1830 and died on 17 December of the same year.

EL BOOM

From the 1960s onward, Latin American literature has gained a worldwide audience and is now regarded as one of the most vibrant and creative in the world. Young writers such as Carlos Fuentes (Mexico, 1929-), Gabriel García Márquez (Mexico, 1928- , Nobel Prize for Literature 1982) and Mario Vargas Llosa (Peru, 1936-) were the most prominent in the **Boom**, as it came to be known, but some older writers also gained a wider audience — for example, Jorge Luis Borges (Argentina, 1899-1986) and Miguel Ángel Asturias (Guatemala, 1899-1974, Nobel Prize for Literature 1967).

Although the **Boom** is often associated with "magic realism", a style which mixes reality and fantasy, this in fact originated with earlier writers such as Asturias, Alejo Carpentier (Cuba, 1904-80) and Juan Rulfo (Mexico, 1918-86), and some of the young writers, notably Vargas Llosa, largely shun fantasy in their work.

LA CABALGATA DE LOS REYES MAGOS

In Spain and Latin America children are traditionally given their Christmas presents on 6 January, the feast of **Reyes** (the Epiphany). The **Reyes Magos** (the Three Kings) are said to deliver the presents on the previous evening. In Spain, to celebrate their arrival on the evening of 5 January, there is a procession of floats through the centre of towns and cities. At the centre of the procession are three floats, each carrying an actor dressed as one of the Three Kings "Melchor", "Gaspar" and "Baltasar".

In Spain, apart from the conventional banks, there are also **cajas de ahorros** (savings banks). These usually carry the name of the region or province where they are based, e.g. "Caja Soria", "Caja de Andalucía". They differ from conventional banks in that part of their profits has to be reinvested in social projects or cultural events which benefit their region. As with other banks, though, many savings banks have merged to form large banking corporations so as to be more competitive. One of the most powerful of these at present is "La Caixa", a savings bank based in Catalonia.

CAMINO DE SANTIAGO

The Galician city of Santiago de Compostela in northwestern Spain, traditionally held to be the burial site of the Apostle St James, was one of the most important Christian pilgrimage centres in Europe during the Middle Ages, second only to Rome. Countless pilgrims made the journey from different parts of Europe to Santiago along recognized pilgrimage routes. The main one crosses the north of Spain from the Pyrenees to Galicia and is known as the **Camino de Santiago**. Although its religious significance has declined, it has become a popular tourist route attracting a wide range of travellers: nature lovers on day trips, hikers and cyclists, and even latter-day pilgrims, whether solitary walkers or on package tours. Many of them avail themselves of the free or low-cost accommodation provided along the way by local councils and religious institutions.

CANTE JONDO

Flamenco singing is traditionally divided into two styles: "cante chico", which is light and cheerful, and "cante grande" (or **cante jondo**), which expresses deeper emotions. **Cante jondo** songs can be about love and death (in songs called "seguiriyas"), or loneliness (in "soleares"). **Cante jondo** is the style with the oldest musical roots and is strongly identified with gypsy culture. Its songs depend less on rhythm and tune than on the often wrenching virtuoso use of the voice, and can be something of an acquired taste, even for Spaniards. This music inspired Federico García Lorca's "Poema del Cante Jondo", which in turn has helped to spread the fame of this style of singing.

CANTINA

The **cantina** (or bar) is an everyday institution in Mexico. Until very recently, only men were allowed in to chat, play dominoes or cards, listen to music and drink, free from the distractions of work and family life. In the 1980s, however, in response to accusations of sexual discrimination, the **cantina** doors were flung open to women, but there are still some traditional **cantinas** for men only.

CANTINFLAS

The Mexican actor Mario Moreno (1911-93) created the comedy character **Cantinflas**, who became famous throughout the Spanish-speaking world. Like Charlie Chaplin, **Cantinflas** was the small penniless man with a big heart and great social aspirations. He wore a raincoat, twisted his moustache, and babbled on (sometimes incoherently) in a language of his own inspired by popular speech. **Cantinflas** featured in many films, but he is best known outside the Spanish-speaking world for playing Passepartout to David Niven's Phileas Fogg, in "Around the World in Eighty Days" (1957).

CARNAVAL

The tradition of **Carnaval**, or **Carnavales**, continues in many parts of Spain and Latin America. The festival usually lasts between three days and a week, just before the beginning of Lent. In country areas the festivals are closely related to fertility rites, while in towns and cities they are more in the nature of spectacles and popular celebrations. The best-known carnivals in Spain are those of Cádiz and Santa Cruz de Tenerife, and in Mexico that of Veracruz. In Spain carnivals end with the "burial of the sardine", an ancient rite symbolizing the burial of worldly frivolity, on the Tuesday before the first day of Lent, Ash Wednesday.

CASTELLANO

Castellano (Castilian) is the official term for Spanish used in the Spanish Constitution of 1978, but "español" (Spanish) and "lengua española" (Spanish language) are often used when referring to Spanish as opposed to French, Italian or German, and also in linguistic or academic contexts. Elsewhere, the term "español" is often avoided because of its associations either with the former colonizing country (in the case of Latin America) or (in Spain) with the domination of Spanish over the other languages spoken in Spain (principally Catalan, Basque and Galician), especially as practised during the Bourbon monarchy in the 18th and 19th centuries and under Franco's dictatorship (1939-75).

CATALÁN

Catalan is one of several official languages in Spain other than Castilian Spanish. Like Spanish ("castellano") and Galician ("gallego"), it developed from late Latin. It is spoken in Catalonia in northeastern Spain, and closely related languages are also spoken in the Balearic Islands ("mallorquín") and the Valencian region ("valenciano").
Catalonia's economic development in the latter part of the 19th century encouraged a renaissance in the use of the language as a literary medium. During Franco's dictatorship (1939-75), Catalan was effectively banned for official purposes, but it continued to be used in everyday life as well as in literature. Since the return of democracy, Catalonia's regional government has promoted Catalan as the official language for use in education.

CAUDILLISMO

Caudillismo is a pejorative term used to describe the social system still prevalent in some regions of Latin America whereby the local political power broker (or "caudillo") demands that the peasants living in his area vote for his preferred candidate in elections, in exchange for his protection.
It is also used to refer to the phenomenon of government by strongmen, either as full-blown dictatorships such as that of Rosas in Argentina (1835-52) or as in Mexico, where the rule could be broken by periods of disfavour and exile, as with Santa Anna (president for much of the period 1833-55), or might alternate with puppet presidents, as with Porfirio Díaz (1876-1911) or Calles (1924-34).

cebiche, ceviche *nm* = raw fish marinated in lemon juice

CEBICHE

Also called **ceviche**, this is a dish consisting of raw fish marinated in lemon juice, the citric acid acting as the cooking agent instead of heat. It is eaten along the entire west coast of Latin America from Chile to Mexico, but is especially popular in Peru. It can be a snack or a main dish, and there are many local and regional varieties. In Peru people usually eat it with sweet potatoes and corn, whereas in Mexico it is served with diced onion and tomato. Today, less traditional ingredients are also used in its preparation. Tragically, a 1991 epidemic of cholera originating in Peru was associated with **cebiche**, although the citric acid should destroy bacteria in the fish or shellfish if they are properly prepared.

Chaco *nm* **el (Gran) ~** the Chaco, = vast region of scrubland and swamp shared by Argentina, Bolivia and Paraguay

LA GUERRA DEL CHACO

Between 1932 and 1935, Bolivia and Paraguay fought a bloody war over claims to the Chaco region, a large barren area which straddles both countries. Believed at the time to be rich in oil, the region had been disputed since colonial times because the border was inaccurately drawn. The Foreign Minister of Argentina eventually brokered a peace treaty between the two countries in 1938 and received the Nobel Peace Prize as a result. The treaty conceded 75 percent of the disputed territory to Paraguay but gave Bolivia the right to use the rivers of the region to gain access to the Atlantic Ocean. During the war, over 100,000 people died in combat or from disease, and the political and economic repercussions were felt for decades in both countries.

CHARRO

The **charro** is the traditional Mexican cowboy. Over centuries of perfecting their skills on ranches, Mexican cowboys have made "charrería" (or rodeo riding) a national institution. "Charreadas" are rodeos where the cowboys lasso cows, bulls and horses, wearing traditional embroidered costumes and wide-brim hats. They also ride wild horses and bulls according to rules set down after the Mexican Revolution.

CHURROS

Churros are a type of fritter which are a traditional Spanish snack. They are made from a flour and water dough which is squeezed by a special machine into long ribbed tubular shapes, which are then fried in hot oil and coated with sugar. They are often eaten with thick hot chocolate at special snack bars called "churrerías". People also eat them at home with coffee for breakfast or buy them to eat out of a paper cone in fairgrounds during their local annual festivals.

COMUNIDAD AUTÓNOMA

The Spanish Constitution of 1978 approved the reorganization of Spain into **comunidades autónomas** (autonomous regions) corresponding to traditional geographical and/or cultural divisions. Regions with a strong sense of distinct identity such as Catalonia, Galicia and the Basque Country (which each have their own language) were quick to receive devolved powers and now have control over their own education, health, police and public services (and certain tax-raising powers). Other regions, however, are still in the process of obtaining this jurisdiction.

CRIOLLO

The term **criollo** (creole) was first used in the 16th century. It meant a descendant of European colonizers (as opposed to a native or African) born in the New World to Spaniards but without the full legal, political or social status of a person born in Spain. The word has acquired different meanings since then in different regions. It can now mean "national" as opposed to "from abroad", referring to anything from people to animal breeds, and can be translated as "Mexican", "Venezuelan" or whatever the relevant nationality may be.

DESAPARECIDOS

The kidnap of alleged subversives and holding of them in undisclosed locations became a widespread repressive technique in many Latin American countries from the 1960s onwards, and is especially associated with the period of the "guerra sucia" (dirty war) in Argentina, Uruguay and Chile in the 1970s. Those kidnapped, whether by the military, secret police or by paramilitary groups, were usually tortured and many were killed. The bodies were disposed of in secret, and in some cases they were dropped from planes over the open sea. Surviving friends and relatives lived for years in a permanent state of anxiety and uncertainty, as they were given no official information about the victim's fate, or the location of their body.

With the restoration of democracy in these countries, there were campaigns for the truth about the kidnap victims (the **desaparecidos**) to be revealed. In spite of the various types of amnesty legislation that the military had enacted before relinquishing power to civilians, it was possible to gain much information about the fate of the victims through truth commissions, and in Argentina some of the most senior of those responsible for the campaign of kidnap, torture and murder have even been brought to trial and convicted.
