latifundio *nm* large rural estate

LATIFUNDIO

A **latifundio** is a huge estate belonging to a single landowner, of the kind found in southern Spain and in many Latin American countries. They have their origins in periods of rapid conquest of territory – from the Moors in Spain in the Middle Ages, and by the conquistadors in Latin America. Historically, they are associated with backward farming methods and poverty among the workers living on them. This is because most of the rich landowners lived away from their estates and were not over-concerned with productivity, leaving the running of the estates to their foremen. The social problems caused by **latifundios** led to agitation for land reform in many countries. Despite land reform programmes, and more dramatic solutions such as the Mexican and Cuban revolutions, the legacy of the **latifundio** still prevails today in many countries.

libertador, -ora ◇ *adj* liberating

◇ *nm,f* liberator; **el Libertador** *(en Latinoamérica)* the Liberator *(name given to certain leaders of the fight for independence from Spain)*

LOS LIBERTADORES AMERICANOS

In the struggle for freedom in the early decades of the nineteenth century, the supporters of Latin American independence had to contend with more than just the defenders of Spanish monarchical rule. They had to work out constitutions which would consolidate the freedom they had achieved. They also had to ensure order and stability, while developing the political structures needed by the newly independent states. The leading figures of these military and political struggles have become heroes both for their own countries, and, collectively, for all of Latin America. They include Simón Bolívar (1783-1830) who was active in gaining independence for Venezuela, Colombia, Ecuador, Peru and Bolivia; José de San Martín (1778-1850) who fought in Argentina, Chile and Peru; and Bernardo O'Higgins (1778-1842) who was active in Chile and Peru.

LUCHA LIBRE

Lucha libre, or freestyle wrestling, is a very popular spectator sport in Mexico and features comical masked wrestlers who often become larger-than-life figures. In any fight there will be a goodie ("técnico") and a baddie ("rudo") and the action consists of spectacularly acrobatic leaps and throws, and pantomime violence. These wrestlers are so popular that they often feature in special wrestling magazines, as well as on television and radio. The most famous of all was "el Santo" (The Saint), who always wore a distinctive silver mask. He appeared in dozens of films and is still remembered with affection despite his death in 1984.

lunfardo *nm* = working-class Buenos Aires slang

LUNFARDO

Lunfardo was the lower-class slang of Buenos Aires in the early years of the 20th century. It was heavily influenced by the speech of the Italian immigrants who arrived in Argentina in huge numbers around the turn of the century. Its vocabulary was popularized through the words of tango music, and many terms have entered popular speech throughout the River Plate region. Despite its humble origins, **lunfardo** is now widely regarded as a fundamental part of the cultural heritage of Buenos Aires, and an academy dedicated to its study was founded in 1962. Nowadays it survives more in the words of classic tango songs than in daily use. Nevertheless, one of the typical features of **lunfardo** persists in popular speech – the inversion of the syllables in a standard Spanish word. Thus one can hear "lorca" used instead of "calor" or "ofri" instead of "frío", and this can be applied to almost any word.

LAS MADRES DE LA PLAZA DE MAYO

The group now known as the **Madres de la Plaza de Mayo** started in Buenos Aires in April 1977, as the response of a group of mothers whose children had been illegally detained by military or paramilitary forces before and after the military coup of 24 March 1976. They could not find their children in prisons or police stations, and when they discovered how many of them there were, they started their silent weekly protest in the Plaza de Mayo, in front of the "Casa Rosada" (National Palace). Their distinctive symbol is a white headscarf, and since 1982 they have carried life-size placards with the outline of their missing children. Their persistence has won them international recognition, and they have developed into a grass-roots political organization in their own right.

MAÍZ

Maíz ("corn" or "maize") is the principal indigenous cereal crop of the New World. It is a domesticated form of a native American grass, which may have been cultivated as early as 5000 BC by the ancestors of the Mayan and Aztec Indians, who bred it over centuries to become the plant we know today. Because of its fundamental role in

society, it was invested with great cultural significance in their creation myths, and other legends and rituals. It is so hardy and productive that after Europeans reached America, its cultivation quickly spread round the world. It is now grown in most countries and is the third largest crop after wheat and rice. Corn is a basic ingredient in many traditional Latin American foods, such as tortillas, tamales and arepas and in drinks such as atole and chicha.

Malinche *n* = Mexican Indian who became Cortés' mistress
malinchismo *nm Méx* = preference for foreign goods, culture, values etc

MALINCHISMO

Malinchismo is a term used by Mexicans to refer pejoratively to the tendency to prefer everything foreign to the home-grown article. It comes from "la Malinche", the name of the Indian woman who served as interpreter to the conquistador Hernán Cortés, and who bore him two children. Like other indigenous people of the time, she may well have seen the Spaniards as allies in a fight against Aztec oppression of her own people, but she is remembered in Mexico today as the archetypal cultural quisling.

malinchista *Méx* ◇ *adj* = demonstrating "malinchismo"

maquila *nf CAm, Méx (de artículos electrónicos)* assembly; *(de ropa)* making-up

maquiladora *nf CAm, Méx* = bonded assembly plant set up by a foreign firm near the US border, *US* maquiladora

MAQUILADORAS

In the 1980s many non-Mexican companies set up assembly plants in areas along the US-Mexican border. They were attracted by the low wages, special tax concessions and the proximity to the US market. They produce many kinds of products, but usually by assembling parts manufactured elsewhere, and by law they must re-export 80 percent of their production. Today these **maquiladoras** are an important source of income for Mexico and they employ more than a million Mexicans – mostly women. The managers are usually foreigners, whereas the hourly-paid workers, who have little job security and few benefits, are Mexican.

maquilar *vt CAm, Méx (artículos electrónicos)* to assemble; *(ropa)* to make up

mariachi[1] *nm* **-1.** *(música)* mariachi (music) **-2.** *(orquesta)* mariachi band **-3.** *(músico)* mariachi (musician)

MARIACHI

A **mariachi** band may contain from six to eight violinists, two trumpeters and a guitarist, as well as other more specialized instruments, such as the "guitarrón" (an outsize, deep-toned guitar), the "vihuela" (a high-pitched guitar), and the harp. As well as providing the music for songs, **mariachi** music serves for dancing as well, often with foot-stamping steps which descend from Spanish Flamenco. **Mariachi** music began to acquire its current popularity in the 1930s, when band members began wearing the typical "charro" outfit that is familiar today - the short black jacket, tight trousers and wide-brimmed "sombrero" hat, all with silver trimmings. **Mariachi** bands were once a common sight at baptisms, weddings and national celebrations, and might even be hired to serenade a loved one, though nowadays they are less common, due to the high cost of contracting their services.

mariachi[2] *adj Méx Fam* ham-fisted; **Celia es bien ~ para cocinar** Celia is hopeless at cooking

marianista ◇ *adj* = of/relating to the Company of Mary, a religious order founded in 19th century France

MATE

Maté is the popular beverage of the River Plate region. It is a tea made from the dried leaves of the "yerba maté" plant. Most typically, it is made in, and then drunk from, a receptacle made from the husk of a small gourd, itself called a **maté**. These can also be made of other materials such as wood, china or bone. The **maté** is drunk through a type of metal straw with a perforated bulbous end called a "bombilla". **Maté** is a stimulant, contains various nutrients, and is held to be good for the digestion. It was drunk by the Guarani Indians long before the Spanish conquest. The conquistadors took to the habit, and also developed it as a commercial crop. Drinking **maté** is an everyday habit today for the majority of people from all social classes in Argentina, Uruguay and Paraguay, and it is felt by many to be an essential part of being from the River Plate region.

MISIONES JESUÍTICAS

The Jesuit missionaries working along the Paraná river (which today flows through Argentina, Paraguay and Uruguay) set up self-sufficient communities for the Guarani indians from 1607 onwards. The communities had their own militias and cavalry for self-defence, and Spanish settlers were forbidden access. The Jesuits allowed for the indians religious practices and beliefs in their teaching of Christianity, and the missions gave them protection from the slavery practised outside. It was, however, their very success which led to their downfall, as they came to be regarded as a rival by the cities of Buenos Aires and Asunción. The missions were finally closed in 1767, leaving over 100,000 indians to their fate. This Jesuit utopia in the jungle was undoubtedly a paternalistic affair, but it has acquired an almost mythical status with the passing years. A recent manifestation of this is the 1986 film "The Mission".

misionero, -a ◇ *adj* **-1.** *(religioso)* missionary **-2.** *(de Misiones)* of/from Misiones *(Argentina)*

◇ *nm,f* **-1.** *(religioso)* missionary **-2.** *(de Misiones)* person from Misiones *(Argentina)*

nahua, náhuatl ◇ *adj* Nahuatl

◇ *nmf (persona)* Nahuatl Indian

◇ *nm (lengua)* Nahuatl

NÁHUATL

Although many indigenous languages were (and still are) spoken in what was to become Mexico and Central America at the time of the Spanish conquest, it was Náhuatl, the language of the Aztecs, which the Spaniards adopted as a lingua franca. This has helped to ensure the survival of the language in better health than others, and has also meant that many of its words entered the vocabulary of Spanish, and through it other languages. In English, for example, we find "tomato", "chocolate" and "avocado". The first books published in Mexico were in Náhuatl, but as a Spanish-speaking ruling class established itself, the importance of the native language declined, although there are still over one and a half million speakers of its various dialects in Mexico today.

LOS NIÑOS HÉROES

When the United States invaded Mexico in the war of 1847, its troops laid seige to the military academy in Chapultepec castle, then on the outskirts of Mexico City. Despite an order to flee to their homes, the military cadets refused to leave, and six who died in the fighting are commemorated as the "Niños Héroes". The youngest was aged just 13 and none was older than 20. Despite some doubts which have been raised about the more colourful aspects of the legend (e.g. wrapping themselves in the national flag and leaping to their deaths from the battlements), they remain among the most honoured figures in Mexico's pantheon of national heroes. When US president Harry Truman placed a wreath at their monument on a visit to Mexico in 1947, the gesture went down very well, so much so that President Clinton repeated it in 1997.

odontólogo, -a *nm,f* dentist, dental surgeon

odorífero, -a *adj* odoriferous

odre *nm (de vino)* wineskin

OEA *nf (abrev de* **Organización de Estados Americanos**) OAS

OEA

The **OEA** (Organización de Estados Americanos or Organisation of American States) was founded in 1948 to promote peace, economic co-operation and social advancement in the Western hemisphere. It also has a committee on legal matters and for observation of human rights issues. Each of its 35 member states has a vote in its decisions. Its General Secretariat is located in Washington, DC, and some have criticised it for being overly influenced by the United States. It was with US encouragement, for example, that the organisation suspended communist Cuba's membership in 1962.

ONCE ['onθe] *nf (abrev de* **Organización Nacional de Ciegos Españoles**) = Spanish association for the blind

ONCE

Spain's "Organización Nacional de Ciegos Españoles" (National Organization for the Blind) or **ONCE** is a non-profit-making organization which helps those with impaired vision in the fields of education and employment. **ONCE** has been remarkably successful in raising awareness (and funds), making it probably the most famous institution of its kind in Spain. This is mainly due to its two best-known activities: firstly, the lottery it runs, for which its members sell tickets in the streets, and secondly, its sponsorship of the cycling team which bears its name.

OPOSICIONES

When a Spanish person wishes to work in the civil service (this includes becoming a teacher in a state school), he or she has to take **oposiciones**. These are public examinations held to fill vacancies on a national, provincial or local basis. The positions attained through these exams normally imply a job for life (with a working day from 8 a.m. to 3 p.m.), and they are much sought after in a country with a tradition of high unemployment. There are usually far too many candidates for every job advertised, so the requirements listed can be extremely rigorous: if you apply to be a mailman or a clerk you may have to show an in-depth knowledge of the Constitution and of Spanish cultural issues. This is why many people spend years preparing for these examinations, especially for posts with more responsibility.

opositar *vi* = to sit a public entrance examination; ~ **a** *o* **para algo** to sit a public exam for sth

opositor, -ora *nm,f* **-1.** *(a un cargo)* = candidate in a public entrance examination **-2.** *(oponente)* opponent

panameño, -a ◇ *adj* Panamanian
◇ *nm,f* Panamanian

Panamericana *nf* **la** ~ the Pan-American Highway

LA PANAMERICANA

The **Panamericana** (the Pan-American highway) runs almost without a break for some 48,000 kilometres from Alaska to the southern tip of Chile, connecting the entire American continent. The project was first proposed in 1925 and construction began three years later, but the road has yet to cross the densely forested Darien Gap in Panama. For all its merits as a prestige project, and its concrete benefits as a means of communication, further construction is dogged by controversy over the real threat to the ecosystem of the rainforest and to the culture of the indigenous peoples who live in the Darien region.

patera *nf* **-1.** *(barca)* small boat, dinghy **-2.** *ver también* **patero**

PATERA

Both legal and illegal immigration into Spain have risen dramatically in recent years, as economic development attracts those from countries with limited job opportunities, especially in North Africa. Many of these immigrants cross the Straits of Gibraltar in small boats which can barely sustain their weight, and which the Spanish press refer to as **pateras**, a term rarely used before but now automatically associated with the idea of illegal immigration.

páter familias *nm Formal* paterfamilias

PERIODO ESPECIAL

In the early 1990s Cuba was hard hit by the fall of Soviet Communism. Financial support and cheap oil imports from the USSR were lost almost overnight, while the US continued with the trade embargo it had imposed in 1962. This led the Cuban government to adopt an emergency economic plan, including food and energy rationing. This period became known as the "**periodo especial** en tiempo de paz" ("special peacetime period") as opposed to the concept of "**periodo especial** en tiempo de guerra" ("special wartime period") which set out an emergency plan for resisting enemy attacks. During these years the Cuban government allowed limited free enterprise, and the use of US dollars as a parallel currency, while investing large amounts in biotechnology research and continuing to promote tourism.

periostio *nm* ANAT periosteum

peripatético, -a ◇ *adj* **-1.** FILOSOFÍA Peripatetic **-2.** *Fam (ridículo)* ludicrous ◇ *nm,f* Peripatetic

PIRÁMIDES MAYAS Y AZTECAS

The major pre-Columbian cultures of Mesoamerica (the area from northern Mexico to Panama) had many common features, not least of which was the construction of ceremonial pyramids. They served as the focus of religious rites, and those of the Maya may also have functioned as astronomical observatories. The discovery in 1952 of a sarcophagus at the heart of the Mayan Pyramid of Inscriptions (built around 680 AD) at Palenque indicated that one at least was used as a tomb. The great pyramids of the Aztec capital Tenochtitlán (built in successive layers over the preceding two centuries) amazed the Conquistadors on their arrival in 1519, though this did not stop the Spanish from demolishing them and using the stone to build Mexico City's cathedral. Today the pyramids, whether ruined or restored, are among the most visited tourist sites in the Americas.

POPOL VUH

The **Popol Vuh** is the Mayan Book of Creation and is thus an essential source for the study of their mythology. The **Popol Vuh**, meaning "the Book of Counsel", is made up of three parts, beginning with the creation of man. The second part tells of the mythical adventures of two gods, and part three narrates the history of the Maya Quiché people until their last kings were killed by the Spanish conquistadors. The codex (or manuscript) used today was written after the conquest in the Quiché language (although using the Latin alphabet) and was translated into Spanish in the 18th century.

posada *nf* **-1.** *(fonda)* inn, guesthouse **-2.** *CAm, Méx (fiesta)* Christmas party

POSADA

A **posada** is a traditional Mexican Christmas party which takes place on one of the nine days before Christmas. To begin with, some of the guests go outside to represent Mary and Joseph, and sing a song asking for a room for the night (this is "pedir posada"). The guests inside sing the response, inviting them in, and the party begins. Along with traditional Christmas fare such as "tamales" (steamed corn dumplings), and drinks such as "ponche" (Christmas punch), there will be a "piñata" for the children. This is a cardboard or papier-mâché container which is suspended over people's heads, and which the children each in turn try to break with a stick while blindfolded. When the "piñata" breaks, its contents are scattered on the floor and there is a rush to gather up the candies.

PREMIO CASA DE LAS AMÉRICAS

The Cuban cultural organisation **Casa de las Américas** set up this prestigious award in 1959. Every year it awards prizes for poetry, drama, novels and essays written in any Latin American language. The prize is the best known Latin-American literary award, and is given for individual works, rather than a writer's entire production. Many well-known Latin-American writers won the prize early in their career, or have served on its international jury.

PREMIO CERVANTES

Every year since 1975, on April 23rd — the day Miguel Cervantes died — the Spanish Ministry of Culture has awarded its **Premio Cervantes** to a Spanish-language writer with a lifetime of literary achievement. The jury is made up of the Director of the Real Academia Española (Spanish Royal Academy), the Director of one of the equivalent Latin American academies, the previous year's winner and other prominent literary figures. It is considered the most prestigious award in the Spanish language (sometimes referred to as the Spanish Nobel Prize) and those who receive it, such as Argentina's Jorge Luis Borges (1978), Mexico's Octavio Paz (1981), or Spain's Francisco Ayala (1991) and Miguel Delibes (1993), are major literary figures.

premioso, -a *adj* **-1.** *(apretado)* tight, constricting **-2.** *(lenguaje, estilo)* laboured

-4. *(máquina)* press ❑ **~ *hidráulica*** hydraulic press

PRENSA ROSA

In recent decades, magazines devoted to the lives of celebrities have become increasingly popular in the Spanish-speaking world. Some magazines have even sought to export their recipe for success abroad. The avid interest of the media in prying into the lives of the famous has transferred to television, and there are a myriad of cheaply produced programs which do little more than hound celebrities attending social functions or just getting on with their daily lives. However, many celebrities have decided to cash in on this public interest and demand huge sums of money to appear in exclusive reports or interviews.

prensado *nm* pressing

PUENTE

When a public holiday falls on a Tuesday or a Thursday, Spanish people usually take another day's holiday to make a four day "long weekend". This is called "hacer puente" (literally "making a bridge"). Depending on the employer, this extra day may be regarded as extra to the agreed annual holidays.

pulque *nm CAm, Méx* pulque, = fermented agave cactus juice

PULQUE

The juice of the agave cactus was used for making drinks for centuries before the arrival of the Spanish in Mexico. The liquid (known as "aguamiel" when first extracted) was fermented to make the viscous, milky drink known as **pulque**. In pre-Columbian culture it was a social, religious and economic institution at the centre of many myths and cults. It was drunk by priests to induce fervour before rituals, or given to the victims of human sacrifice, or to warriors before battle. Still considered an aphrodisiac, it is less popular today. Most of the old "pulquerías" (or pulque bars) have disappeared, and attempts to bottle **pulque** have not proved popular. However, tequila and mescal, which are distilled from the sap of agave cacti, are becoming increasingly popular internationally.

quechua, quichua ◇ *adj* Quechuan
◇ *nmf (persona)* Quechua
◇ *nm (idioma)* Quechua

QUECHUA

Quechua is an Amerindian language spoken by more than eight million people in the Andean region. In Peru, something between a quarter and a third of the population use **Quechua**, and the position in Bolivia and Ecuador is similar. It is also spoken in northern Chile and Argentina, and southern Colombia. **Quechua** was the language of the Inca empire, so the variety spoken in the Inca capital of Cuzco was the most important of its many dialects. The number of speakers declined dramatically in the centuries following the Spanish conquest, but in more recent years there have been official attempts to promote the language. As with the Aztec language Nahuatl, many **Quechua** words passed into Spanish, and on to many other languages. For example, in English we find "condor", "jerky" (*n*, = dried meat) and "quinine".

quechuismo *nm* = word or phrase of Quechuan origin

RAE ['rrae] *nf (abrev de* **Real Academia Española**) Spanish Royal Academy

RAE

The "Real Academia Española" or **RAE** (Spanish Royal Academy) is the institution which sets the lexical and syntactic standards for the use of Spanish through the dictionaries and grammars it produces. It was founded in 1713, on the model of the French Academy. Its first major task was to produce a dictionary, the six-volume "Diccionario de Autoridades" (1726-39). This served as a basis for a single-volume dictionary which appeared in 1780, and this has been continually revised, the latest update being the 22nd edition of 2001.

The 46 members of the Academy are elected from among leading writers and intellectuals, though the first woman member did not arrive until 1978. They meet regularly to deliberate on problematic aspects of the language, and to discuss possible linguistic reforms. The Academy has been regarded by some as a conservative institution, out of touch with the everyday language used in the street and the varieties of Spanish spoken in Latin America. To address this latter issue, closer ties have been established with the various corresponding Academies of each of the Latin American countries, and regular international conferences have been held since 1951.
