Ideal for classroom and study use

COLLINS-ROBERT CONCISE FRENCH-ENGLISH ENGLISH-FRENCH DICTIONARY

This new Concise edition of the Collins-Robert French Dictionary, 'now widely recognized and admired as the outstanding achievement in bilingual lexicography since the war' (*Times Educational Supplement*), has been prepared by the same experienced team of French and English lexicographers. It combines extensive coverage with outstanding clarity, simplicity and economy, making it the ideal reference book for home, school and office use.

These are some of the features of the dictionary:

- Over 100,000 references – more than in any comparable French-English English-French dictionary – give wide-ranging coverage of current French and English.
- The basic, most frequently used words in both languages are treated in detail, helping the user not only to understand but also to translate idiomatically.
- Thousands of phrases and examples show how particular words are used in different contexts and how the translation can vary according to the context.
- A clear system of indicating words divides the entries into specific areas of meaning, enabling the user to find the correct translation immediately.
- Style levels are marked by the unique Collins-Robert system of asterisks and daggers to provide advice and warnings to the user who finds an unfamiliar word or meaning.
- Other special features include fully up-to-date wordlists, full pronunciation in IPA for every headword, comprehensive French verb tables (with a cross-reference from every French verb headword to the appropriate verb table), and full treatment of English phrasal verbs.

INTRODUCTION

Le Robert & Collins 'Junior' a été établi à partir du texte abrégé et remanié du dictionnaire français/anglais, anglais/français Le Robert & Collins. Il conserve de ce fait les principales caractéristiques de son aîné: refléter les deux langues, permettre au francophone et à l'anglophone de traduire à la fois dans sa propre langue et dans la langue étrangère et de s'y exprimer avec assurance et précision.

'Il a été débordé par un diable qui a sauté le mou!'

Que penseriez-vous du malheureux anglophone vous annonçant cette nouvelle? Pourtant il voudrait seulement vous dire qu'un camion, en passant au feu rouge, a écrasé quelqu'un ('he was run over by a truck which jumped the lights').

Ne riez pas, vous pourriez affirmer des choses bien plus ridicules en essayant de parler anglais. Tout cela parce que vous utilisez des mots que vous ne connaissez pas. Des mots que vous avez trouvés dans un dictionnaire.

Justement, prenez le verbe **sauter**. Tout le monde vous dira que l'anglais est **to jump**. Mais est-ce toujours vrai? Ouvrez un dictionnaire et vous aurez le plus souvent une série de mots anglais inconnus, comme **to pop out**; **to blow up**; **to fuse**; **to be cancelled**. Comment choisir celui qui convient? S'il s'agit d'un bouchon de champagne qui saute, il faut utiliser **to pop out** (= partir), pour un coup, ce sera **to blow up** (= exploser), pour un circuit électrique **to fuse** (= fondre), enfin, si c'est un cours qui a sauté, vous devez prendre **to be cancelled** (= être supprimé).

Ce qu'il faut éviter, c'est de dire que le bouchon a fondu, que le cours a explosé ou que le pont est parti.

Vous comprenez donc que vous pouvez dire toutes sortes d'absurdités en anglais en choisissant la première traduction venue du mot français que vous cherchez. Pour trouver le mot juste, vous devez vous laisser guider par des 'panneaux de signalisation', et dans ce dictionnaire ils sont toujours en italique.

En tournant la page, vous verrez comment cette signalisation fonctionne.

INTRODUCTION

The Collins-Robert Concise Dictionary is an abridged version of the Collins-Robert French Dictionary and has been written with the same main objectives: to reflect the two living languages and to enable the user of either nationality to translate both into and from the foreign language, and to express himself in it correctly and confidently.

'Attention not to make yourself squash, you've got to beat inside the nails.'

You'd probably back away from the poor Frenchman who said that, leaving him quite mystified, for he'd only been trying to warn you to cross at the pedestrian crossing if you didn't want to get run over. ('Attention de ne pas te faire écraser, tu dois marcher dans les clous.') Don't laugh - if you try to speak French you could find yourself saying even odder things. All because you're not using words that you know, but words that you've found in a dictionary.

Take the word **cut**: most people would say this is **couper** in French - but is it? If you look it up in the dictionary, you're often faced with a row of unknown French words, like **tondre**, **graver**, **réduire** or **sécher**. How are you going to decide which is the word you want? Of course it depends what you're going to cut. Cut the grass and you would use **tondre** (= to mow); cut a disc and it would be **graver** (= to engrave); if you're cutting expenses you'd need **réduire** (= to reduce), and if you're going to cut classes you'd be looking for **sécher** (= to miss).

What you don't want to say is that you're going to mow the disc, or engrave the lawn and so on.

You'll understand from this that if you look up an English word in the dictionary and take the first French word you come across, you could find yourself talking or writing nonsense. If you want to reach the right French word, you have to read the signposts, and in this dictionary these signposts are in italics.

If you turn this page, you'll see what kind of signposts we've given you ...

couche [kuʃ] *nf* (a) (*gén*) layer; (*peinture*) coat. ~ sociale social stratum; (*fig*) en tenir une ~* to be really thick*. (b) (*Horticulture*) hotbed. (c) [*bébé*] nappy, diaper (US). (d) (*Méd: accouchement*) ~s confinement; mourir en ~s to die in childbirth. (e) (*littér: lit*) bed.

coucher [kuʃe] (1) 1 *vt* (a) (*mettre au lit*) to put to bed; (*donner un lit*) to put up. être/rester couché to be/stay in bed. (b) *blesé* to lay out; *échelle* etc to lay down; *blés* to flatten. être couché to be lying. (c) (*inscrire*) to inscribe. (d) ~ en joue fusil to aim; *personne* to aim at. 2 *vi* (*dormir*) to sleep (*avec* with). cela nous a falt ~ très tard that meant we went to bed very late. 3 *se* ~ *vpr* to go to bed; (*s'étendre*) to lie down; [*soleil, lune*] to set, go down; [*bateau*] to keel over. 4 *nm*: le (*moment du*) ~ bedtime; le ~ des enfants the children's bedtime; (*au*) ~ du soleil (at) sunset ou sundown (US). ♦ **couchette** *nf* [*voyageur*] berth, couchette; [*marin*] bunk.

coucou [kuku] *nm* (*oiseau*) cuckoo; (*pendule*) cuckoo clock; (*péj: avion*) (old) crate; (*fleur*) cowslip. ~ (*me voici*)! peek-a-boo!

Comment dire en anglais: 'le coucou pousse dans les bois'? L'article **coucou** vous donne plusieurs mots: cuckoo; cuckoo clock; (old) crate; cowslip. Sans autre indication, vous choisirez au hasard, vous prendrez sans doute la première solution en produisant un effet comique involontaire.

Aussi l'article contient-il autre chose, des mots français en italique placés entre parenthèses devant chaque traduction: (*oiseau*); (*pendule*); (*péj: avion*); (*fleur*). Voilà vos panneaux de signalisation. Ils correspondent chacun à un sens différent du mot **coucou**. Vous pouvez choisir avec certitude ce que vous voulez, dans notre exemple, bien sûr: (*fleur*) cowslip.

L'exemple est simple, mais prenez le mot **coucher**. Il peut être verbe transitif (coucher quelqu'un ou quelque chose) ou verbe intransitif (coucher dans un lit) ou verbe pronominal (se coucher tard); il peut aussi être un nom (l'heure du coucher). Des chiffres vous indiquent ces différentes fonctions pour vous aider dans vos recherches: 1 *vt* (transitif) - 2 *vi* (intransitif) - 3 *se* ~ *vpr* (pronominal) - 4 *nm* (nom masculin).

Vous savez aussi qu'on peut coucher des choses très différentes: un bébé dans son berceau, une échelle sur le sol, des mots sur le papier, on peut aussi coucher quelqu'un en joue. Pour vous mettre plus rapidement sur la voie, des lettres (a) - (b) - (c) - (d) séparent ces grandes zones d'emplois.

Si vous connaissez la traduction dans le premier cas: 'to put to bed', vous devinez qu'elle ne peut s'appliquer ni à l'échelle, ni au blé couché par le vent, c'est pourquoi ces deux mots en italique (ils sont compléments d'objet du verbe) vous renseignent: *échelle* to lay down; *blés* to flatten. Mais comment direz-vous, par exemple, 'coucher un meuble sur le côté'? Comme il n'est pas possible de citer tous les objets que l'on peut coucher, c'est le mot *échelle* qui est chargé de le représenter, tout comme *blés* veut dire *herbe*, *avoine* etc... Donc, 'coucher un meuble' se dit 'to lay a piece of furniture down'.

Lorsqu'il s'agit de pourvoir quelqu'un d'un lit, vous pourriez logiquement croire que 'coucher un bébé' et 'coucher un ami pour la nuit' se disent de la même manière, mais de nouveaux panneaux

(des synonymes entre parenthèses) vous avertissent que (*mettre au lit*) un bébé se dit 'to put to bed' et que (*donner un lit*) à un ami se dit 'to put up'.

Dans le verbe **se coucher**, de nouveaux panneaux vous aident à trouver votre chemin: [*soleil, lune*] to set, go down; [*bateau*] to keel over. Ce sont des sujets du verbe et ils sont placés entre crochets pour les distinguer des autres indications dont nous venons de parler.

Regardez maintenant l'article ♦ **couchette**. Comme il ne forme pas un article principal, il est précédé d'un losange pour le faire ressortir. Il y a d'autres mots entre crochets: [*voyageurs*] et [*marin*]. Ce sont des compléments du nom **couchette**. Ils vous indiquent qu'une couchette de [*voyageur*] se dit 'berth' ou 'couchette' alors qu'une couchette de [*marin*] se dit 'bunk'.

Dans l'article **couche**, vous retrouvez un certain nombre d'indications du même type. Il y en a aussi de nouvelles. En voici quelques-unes:

... (*gén*) qui précède le mot anglais 'layer' signifie que cette traduction est la plus générale de **couche**, celle qui est valable dans le plus grand nombre de cas.

... (US) qui suit le mot 'diaper' indique que c'est la manière dont on dit 'couche de bébé' en américain.

Il y a aussi un astérisque: * à la fin de l'expression 'en tenir une ~*', ainsi qu'à la fin de la traduction 'to be really thick*'. Cet astérisque indique que l'une et l'autre sont familières. Si une expression est très familière, elle sera suivie de deux astérisques: *. Si par contre elle est démodée, elle sera suivie d'une croix: †.

Vous remarquerez enfin que le mot **couche** n'est pas repris dans l'article. Il est remplacé par le signe ~ qui évite la répétition.

Dans la partie Anglais-Français du dictionnaire (cf. page ci-contre) vous remarquerez que les mots en italique sont en anglais, pour aider le lecteur anglophone. En tant que Français, vous-même n'avez pas besoin de précisions sur le sens des traductions françaises!

Les pages suivantes, à partir de deux colonnes prises dans le texte, regroupent tous les éléments de cette signalisation.

USING THE DICTIONARY

aid [eid] 1 **n** (a) (*help*) aide *f.* with the ~ of sb avec l'aide de; *sth* à l'aide de; in ~ of the blind au profit des aveugles; (fig) what is the meeting in ~ of? c'est dans quel but, cette réunion? (b) (*helper*) aide *mf*, assistant(e) *m(f)*; (*apparatus*) aide *f*, moyen *m.* audio-visual ~s support audio-visuel, moyens audio-visuels. 2 **vt** (gen) aider (to do à faire); progress, recovery contribuer à. (Jur) to ~ and abet sb être complice de qn.

aim [eim] 1 **n** (a) to miss one's ~ manquer son coup; to take ~ viser (at sb/sth qn/qch); his ~ is bad il vise mal. (b) (*purpose*) but *m.* with the ~ of doing dans le but de faire; her ~ is to do elle a pour but de faire. 2 **vt** gun braquer (at sur); stone lancer (at sur); blow décocher (at à); remark diriger (at contre). 3 **vi** viser. to ~ at sth viser qch; to ~ at doing or to do viser à faire, (less formally) avoir l'intention de faire. ♦ **aimless** *adj* sans but. ♦ **aimlessly** *adv* wander sans but; stand around sans trop savoir que faire; chat, kick ball about pour passer le temps.

alight¹ [ə'laɪt] **vi** [*person*] descendre (from de); [*bird*] se poser (on sur).

Suppose you want to say in French 'with the aid of a dictionary': you look up **aid** in the dictionary. If you know that in your sentence the word 'aid' is a noun (*n*), and not a transitive verb (*vt*), then you will go straight to the section marked 1 *n*. This is in two parts, (a) and (b); the 'aid' that you're looking for is obviously the one marked (a) (*help*), and not (b) (*helper*) or (*apparatus*). You find the French word 'aide' *f*. Read on and you have the phrase you're looking for: 'a dictionary' is obviously a thing (*sth* means 'something') and not a person (*sb* means 'somebody'), so you can now translate your phrase 'with the aid of a dictionary' - 'à l'aide d'un dictionnaire' ('with the aid of his brother' would be 'avec l'aide de son frère'). You'll see in this particular dictionary the sign ~, which we use to avoid having to keep repeating the headword, in this case **aid**.

You will have noticed that the gender of a French noun is always given, i.e. 'aide' *f*; normally this is done by using *f* for 'feminine' and *m* for 'masculine'. Sometimes the gender is already clear from the adjective which goes with the noun, and there is no need for *m* or *f*; thus, a few lines further on in the **aid** entry, **audio-visual** ~s is translated by 'support audio-visuel, moyens audio-visuels' - the masculine ending of 'audio-visuel' in both cases tells you that it is 'le support' and 'le moyen'.

Suppose however you'd been trying to put into French 'they aimed the searchlights at the plane'. From the entry **aim** 2 *vt* (= verb transitive) you have to use the English in *italics* to help you choose the right French word to translate 'aim' in your sentence. Is 'aiming a searchlight' closer to 'aiming a gun' or to 'aiming a stone' at something? You obviously point a searchlight in the same way as you point a gun, you don't throw it, and so you would choose 'braquer': 'ils ont braqué les projecteurs sur l'avion'.

Further down the page you'll find **aimlessly** (the ♦ sign before it is just to help you find it more easily, since it's not a main headword like **aim**). If you want to talk about someone 'hanging about aimlessly on street corners' you'd pick **stand around** as nearest to 'hang about', and say 'Il trainait au coin de la rue sans trop savoir que faire'.

Similarly under **alight**, for passengers who 'alight' from a coach, you would follow the signpost [*person*] and choose 'descendre', rather than 'se poser', which you'd use for a blackbird 'alighting' on a branch.

You may be puzzled by the word (*gen*) in **aid** 2 *vt*: it means 'generally' or 'usually' and it tells you that usually the French for 'aid' is 'aider', but - look further on - if something is aiding progress or recovery (or development or anything else like that) then the translation of 'aid' would be 'contribuer à'; thus 'aider quelqu'un à faire quelque chose', but 'contribuer au progrès de quelque chose'.

Lastly, the asterisk (in **aid** 1 *n*: what is the meeting in ~ of?) shows that this is something you'd happily say to someone, but not perhaps write in a formal piece of writing like an essay, or an application for a job. If an English or French phrase has two asterisks, this means that it is definitely slangy.

In the French-English side of the dictionary (see the opposite page) you'll notice that the words in *italics* are in French, to help the French user. As an English speaker, you don't need any help with your English!

If you want to know in more detail what all the signposts mean in this dictionary, turn over - they're all explained on the next page.

traductions interchangeables séparées par une virgule	égide [ejid] nf: sous l'~ de under the aegis of. églantier [eglâtje] nm wild rose(-bush). ♦ églantine nf wild rose, églantine.	alternative translations separated by a comma
